The City of Mills works to control mosquitos during the summer. To help protect urban bee hives, the City of Mills is asking urban bee keepers to register their hives. Although fogging occurs in the evening when bees have returned to their hive for the day; there is still the potential that hives could be harmed. By registering your hive, we can strategically fog to control mosquitos and protect your hive. Please register your hive even if you have registered or licensed your apiary with the Wyoming Department of Agriculture.

Incomplete applications cannot be processed
