## Carports in Mills, WY

Carport: A structure open on at least two (2) sides used generally for covering vehicles. If the carport is not open on at least two (2) sides, it shall be considered a garage and will have to comply with all code requirements for a garage, including all zoning setbacks, lot coverage requirements and issuance of a building permit. The carport must be secured with vertical strapping and/or concrete anchors and be approved by the Building Inspector.

I \_\_\_\_\_ am building a carport on my property and have read the  
(Printed Name of Landowner)

above concerning a carport and will not enclose the carport in the future and will notify any future owners of the same.
